Professional Summary

Results-driven Junior Frontend Developer with a solid foundation in HTML, CSS, JavaScript, and React, focused on building responsive and user-friendly web interfaces. Familiar with Git and GitHub for basic version control and experienced in translating design layouts into clean, structured, and maintainable code. Eager to apply core frontend development skills in real-world projects while continuously learning modern development practices. Motivated to join a collaborative team environment where I can gain practical experience, improve problem-solving abilities, and grow into an advanced frontend developer while contributing to high-quality web applications.

Professional Experience

Developers Hub — WordPress Developer (HTML, CSS, JavaScript) Islamabad, Pakistan | June 2025 – Aug 2026

- Built and customized WordPress websites using HTML, CSS, and JavaScript, focusing on responsive layouts and clean user interfaces.
- Converted basic design ideas and client requirements into functional web pages and theme adjustments.
- Assisted in improving existing websites by modifying frontend structure, styling, and layout responsiveness.
- Collaborated with team members to understand project workflows and gain practical exposure to real-world web development processes.
- Communicated with clients through Upwork, helping coordinate project requirements and ensuring timely delivery.
- Actively explored modern frontend practices while working on projects, with a strong focus on continuously improving development skills and understanding professional development environments.
